Building Academic Vocabulary Robert J. Marzano, Debra J. Pickering, 2006-12-01 In *Building Academic Vocabulary Teacher's Manual* Robert J. Marzano and Debra J. Pickering give teachers a practical way to help students master academic vocabulary. Research has shown that when teachers, schools, and districts take a systematic approach to helping students identify and master essential vocabulary and concepts of a given subject area, student comprehension and achievement rises. In the manual, readers will find the following tools: A method to help teachers, schools, and districts determine which academic vocabulary terms are most essential for their needs; A six-step process for direct instruction in subject area vocabulary; A how-to to help students use the *Building Academic Vocabulary Student Notebook*; The six-step method encourages students to learn critical academic vocabulary by connecting these terms to prior knowledge using linguistic and non-linguistic means that further encourage the refinement and deepening of their understanding; Suggestions for tailoring academic vocabulary procedures for English Language Learners; Samples and blackline masters for a variety of review activities and games that reinforce and refine student understanding of the academic terms and concepts they learn; The book also includes a list of 7,923 vocabulary terms culled from the national standards documents and other publications, organized into 11 subject areas and 4 grade-level categories. *Building Academic Vocabulary Teacher's Manual* puts into practice the research and ideas outlined in Marzano's previous book *Building Background Knowledge for Academic Achievement*.
